**Re: Approval of One Biotechnology's BioSmart™ Product for discharge to the Orange County (and City of Orlando) Sanitary Sewer Service Areas**

Ms. Eavey,

Orange County and the City of Orlando are pleased to inform you that the BioSmart™ product, manufactured by One Biotechnology, is approved for use in treating drain lines of commercial facilities discharging to the Orange County and/or City of Orlando sanitary sewer service areas. This product has been shown to have no detrimental impact to the quality of the wastewater discharge to the receiving county/city sanitary sewer facilities."

Please let Hope Duncan (Environmental Coordinator over the County's Oil and Grease Prevention Program), Justin Prince (Senior Environmental Specialist over the City of Orlando's Oil and Grease Prevention Program) or me know if you have any questions related to this matter.

Respectfully,

A handwritten signature in blue ink, appearing to read "Susanna Littell".
